

# SPLASH

## CHILDREN'S BOARD BOOK DIE-CUTTING MACHINE

### MAIN FUNCTIONS

**Splash** allows to produce books with board pages that can be die-cut on the edge through different cutting patterns. The machine is composed of two pressing stations equipped with wooden die-cuts mounted on their bases. The modular construction of **Splash** allows to place several stations side by side in order to die-cut different pages at a time according to the request, without needing to continuously stack the product. The die-cutting surface covers a mm 120 x mm 250 area and enables to die-cut materials up to 1 ton pressure (optional: 1,5 Ton).

Distance between book block back and die-cut: 120 mm.

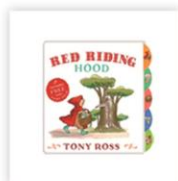

On every **Splash** unit two operators can work simultaneously without any problem.

### TECHNICAL DATA

|                      |                      |
|----------------------|----------------------|
| Pression:            | 1-1,5 Ton            |
| Die-cutting surface: | 120 x 250 mm         |
| Type of die-cut:     | Wooden die-cut       |
| Pressing units:      | 2                    |
| Power supply:        | 220 V / 50 Hz / 1 Ph |
| Net weight:          | 350 kg               |
| Dimensions:          | 165 x 82 x 148 cm    |
